IU Health offering free virtual screenings for <u>COVID-19</u>

Indiana University Health has launched a virtual clinic to offer individuals in Indiana, regardless of age, free coronavirus (COVID-19) screenings using the [IU Health Virtual Visit app](). Those in Indiana can learn more about the app in this [instructional video]().

To date, over 900 people have used the free IU Health virtual clinic to screen for COVID-19, including the second identified patient in Indiana to test positive for COVID-19. As of this release, 10 cases have been identified in Indiana.

"Our first priority is the health and safety of our communities," said Michele Saysana, MD, chief quality and safety officer, IU Health. "If you are experiencing symptoms or concerned you may have the virus, we recommend using this virtual clinic or calling your doctor before heading to an emergency department."

Staffed 24/7 with IU Health physicians, advance practice providers and registered nurses, the clinic will screen patients from home, potentially eliminating the need to visit physician offices, urgent cares or emergency departments. The team will recommend and facilitate appropriate pathways for care, and provide direct access and communication with local hospitals as medically appropriate.

How can you access the hub?

1.   Download the free IU Health Virtual Visits app ([Google Play]() or [iTunes]()) or [enroll on your computer]().
2.   Enroll by creating a free login and completing your personal profile.
3.   Connect with the virtual hub, select "Coronavirus Screen" and find the appropriate pathway for care.
